

Green Courses, Certificates, Colleges and Careers

September 29, 2010 4-6 pm

No-cost workshop for counselors, teachers, parents and high school students

SMUD | 6301 S Street | Sacramento | CA | 95817

Many students are looking for ways to incorporate sustainability and building green practices into their education. With national and statewide emission legislation as a driving force, many changes are occurring in the economy and business sectors which are transforming existing jobs and creating brand new career opportunities. These new professions which not only promote a healthier way of living but also enable sustainable careers centered around eco-friendly practices.

Jill Yoshikawa, Ed M of Creative Marbles Consultancy will present strategies to identify green educational programs and majors and tips for finding green careers and internships. Jill is a Harvard and UCSD graduate, who will help simplify the complexities of researching green college options, as well as answer general questions about college admissions.

Also offering information on green courses, certificates, and majors will be representatives from local colleges who will answer questions on Green Building Design, Alternative Transportation, Wind Technology, Clean Biodiesel Technology, and Solar

Pre-registration is required
